

# YELLOW JACKET® 60278 Deluxe 45° Flaring Tool

**Newer model 60278 with blue handle will create larger flares required by some R-410A equipment manufacturers**

- Introduced September 2008
- Designed with all R-410A system requirements in mind

R-410A Flare Diameters

Installation instructions for systems using R-410A vary between manufacturers with respect to 45° flares. Some require the larger flares produced by the Deluxe 45° Flaring Tool (60278) while others prefer the rolled flare produced by the eccentric cone flaring tool.

**Older model 60280 with red handle will produce the smaller but not the larger flares required by some R-410A equipment manufacturers.**

- Sold prior to September 2008
- This model cannot make the larger diameter flares required by many R-410A equipment manufacturers.
