

YELLOW JACKET® R-600a Gauges

May be of interest to U.S. appliance repair technicians.

Concerns with depletion of the ozone layer by freon gases have led to increased use of isobutane as a gas for refrigeration systems, especially in domestic refrigerators and freezers, and as a propellant in aerosol sprays. When used as a refrigerant or a propellant, isobutane is also known as R-600a.

Replacement Gauges:

- 49149 3-1/8" Red Pressure
- 49150 3-1/8" Blue Compound

Manifold:

- 41866 Series 41 2 Valve, R-600a, psi, bar, and kPa, °C and °F

These are universal gauges:

- Pressure - psi, bar, and kPa
- Temperature - °C and °F
