# FIELD SCRAP AUTHORIZATION FORM

## Policy

### ITEMS COVERED

Hoses, manifolds, tubing tools, replacement gauges, fittings and adapters, gas and fuel oil test kits, scanner solutions, UV dye products, test leads, mechanical psychrometers, and mechanical thermometers.

### EXCEPTIONS

**Hoses** - Only individual hoses are covered. 3-pack hoses do not qualify for field scrap and will not be credited. Stainless steel corrugated hose assemblies are also not covered under this policy and cannot be field scrapped. Individual hoses are available to order and stock for single hose field scrap replacement needs.

**Manifolds** - YELLOW JACKET® manifolds have a one-year warranty (lifetime warranty applies only to the manifold bar). For out-of-warranty returns call our customer service department for instructions. If a gauge has failed, replace the gauge, and follow the above procedure for credit on the failed part. Manifolds with hoses are not considered a field scrap item.

**Tools** - Hand tools are covered except for tool kits. Field scrap the failed part only and a credit will be issued for that part. The hydraulic expanders do not qualify for field scrap.

**The following products must be returned to the factory for in-warranty repair and return. Please call for a Service Repair Order (SRO) number and label that is required to accompany the return. If an item is received without proper documentation, it may be returned or discarded.**

- Electronic Leak Detectors
- Electronic Products
- Electronic Scales
- Leak Monitors
- Recovery Machines
- Refrigerant Identifier
- Refrigeration System Analyzers
