

# NEW PRODUCT ANNOUNCEMENT

# YELLOW JACKET®

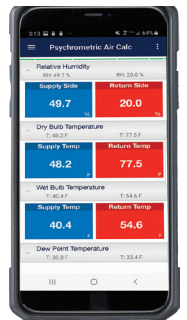

## "Going with the Flow"...airflow that is...with the YJACK FLOW™ Wireless Anemometer.

The YJACK FLOW™ Wireless Anemometer by YELLOW JACKET® is the newest member of the YJACK® Series of Wireless Probes. The YJACK FLOW™ P/N 67069 measures the air speed in ducts and ventilation systems. YJACK FLOW™ takes accurate air flow measurements up to 30 m/s, measuring the entire duct flow to account for turbulence or completes a single line air flow for fast duct-to-duct flow comparisons.

36" PROBE SOLD SEPARATELY

Users may view system readings on the integrated display or view and analyze all system measurements with the YJACK VIEW® App 5.0, which includes the new Anemometer Session to display the YJACK FLOW™ air volumetric measurements. The YJACK VIEW® App displays and stores the duct size, probe placement requirements and the data averaged to give you volumetric flow. Once all the system measurements have been captured, the reporting function saves the readings in a customizable PDF service report.

## Product Specifications

Please see YJACK® Product Spec Sheet P/N 10174 for additional wireless probes and YJACK VIEW® App information. For more information, go to: <https://yellowjacket.com/product/yjack-flow/>

## Features & Benefits

- Automatically calculates quantity and locations of readings in rectangular and circular ducts based on ASHRAE standard 41.2P
- Local display gives duct air speed readings in fpm, ft/s, m/s and m/min for quick hand calculations of known duct-free area
- Interchangeable telescoping probes 18" (included) and 36" (optional) for small and large ducts - never need calibrating
- Multi-point magnetic mount to secure the probe in ducts for hand-free monitoring

## Features & Benefits - *Continued*

- Lightweight, compact anemometer fits in the palm of your hand – the YJACK FLOW™ with 18" probe and magnetic duct mounting adapter weighs less than 1 lb.
- Standard 18" probe collapses to 13" x 1 ¼" x 1 ¾"
- Visually verify air speed before sending to app for data recording and CFM calculating
- Easily backtrack through recordings to reenter readings if any error was found in last set of readings
- Quick coupler fitting for versatile wand attachment
- Electronic paper display for clear visibility – even in direct sunlight
- Bluetooth® 5.2 compliant low energy radio
- Protective carrying case to store both 18" and 36" wands, the anemometer and magnetic duct mount
- 2-year warranty
- Made in the USA 

## Target Customers

All HVAC/R contractors and service technicians

## Product Applications

HVAC/R installation and system service

## Availability

- Shipping to YELLOW JACKET® Distributors now
